

AI/ML Postdoc position at Genentech Research

We have an opening for a [Postdoctoral Fellow, Artificial Intelligence and Machine Learning in Drug Discovery](#) in our new Department of AI and ML within Genentech Research and Early Development. It's a unique balance of academic-style research with a focus on publishing with the opportunity to impact our real drug discovery efforts, all while collaborating with scientists across the organization. Postdocs at Genentech are well-compensated, have a tremendous amount of intellectual freedom, and have a strong emphasis on publishing and training in preparation for a career in both industry and academia. As part of our Department of AI and ML, there is the opportunity to get in-depth experience at the intersection of multiple, highly-interdisciplinary fields while working on cutting-edge research.

We highly encourage applicants from diverse backgrounds to apply.

The position is for four years and includes competitive salary (>\$85k gross) and benefits - you can find more details about Genentech postdoc program [here](#). Feel free to drop Kangway (chuang.kangway@gene.com) a message after you apply so that he is aware of your application.
