

ASSISTANT PROFESSOR OF PHYSICS

I am writing to you on behalf of the Physics and Astronomy department at Union College, where we have a tenure-track position open in experimental physics. We would highly appreciate it if you have a few minutes to share this advertisement with those who may consider applying to join us. Please note that we routinely sponsor the visa and green card applications of international candidates.

<https://jobs.union.edu/en-us/job/492980/assistant-professor-of-physics>

We encourage applications from nuclear and particle physics, as well as those who could make interdisciplinary connections with the department's ion-beam [facility](#). I want to provide you with some additional information about our college and our department. Union is a liberal arts college in Schenectady, NY. Faculty members here are focused on teaching undergraduates and on research in the context of a community that fosters close working relationships. Our department has a welcoming and mutually-supportive environment for both teaching and research.

Union is a historic college, having been founded in 1795 as the first non-denominational college in the U.S. Our mission is to develop in our students the analytic and reflective abilities needed to become engaged, innovative, and ethical contributors to an increasingly diverse, global, and technologically complex society. We are part of a metropolitan area of more than a million people with proximity to both major cities and outdoor recreation--we are convenient to Boston, Montreal, and New York City (3-hour drive to each plus frequent Amtrak service to NYC) as well as the Adirondack Park and Vermont.

For those of you who are considering applying to join us, we are looking forward to giving your application full consideration. Please note that we routinely sponsor the visa and green card applications of international candidates. Our winters are cold, but while we are challenging ourselves and our students to understand and address pressing problems facing the world, hot tea and good conversation are always available in this charming community.

*Sincerely yours,
Dr. Cecilia Bores, Assistant Professor in Physics and Astronomy*
