

## Master in High Performance Computing (MHPC)

Dear ICTP Associates,

We wish to draw your attention to the Master in High Performance Computing (MHPC) programme.

The Master in High Performance Computing (MHPC) programme, coordinated by ICTP and the International School for Advanced Studies (SISSA), is now accepting applications for the 2022-2023 academic year. Classes begin in September.

As in prior years, ICTP is providing scholarships for applicants from developing countries. The deadline for application is 30 April 2022.

The MHPC is an innovative master programme that prepares students for exciting careers in the fast-growing field of high performance computing (HPC). Set in the stimulating research environment of ICTP and SISSA, the programme combines lectures with hands-on and applied projects to prepare future HPC specialists for both academia and industry.

Students who successfully complete the program will be able to address problems requiring advanced computational techniques in multiple domains, and communicate HPC technological issues in all scientific and industrial environments.

Interested applicants should use the relevant application form available at <https://e-portal.ictp.it/applicant/login>

For more information please visit the following link: <https://www.mhpc.it/>

All the best,

Associates Office
